

KENNEDY KRIEGER INSTITUTE
CHILDRENS HOSPITAL

KKI: 12-19-03
AL-YASSIN, Haya

DEPARTMENT OF
PHYSICAL THERAPY

DOB: 06/09/03
Date Written: 07-07-2008

Positioning Protocol

JHH: 7/7/08
Date/Time Entered: 16:46

Pressure Relief Behavior: D – Pt is able to perform pressure relief and remembers to do so at least 75% of the time, but continues to require occasional reminders.

Precautions:

Fall risk

Equipment: None

Transfers: Dependent x 1

Schedule for positioning:

9am – 12pm stroller sitting
12pm – 2pm lying in bed in position of comfort for patient
2pm – 5pm stroller sitting

Haya is able to independently position herself in bed to her own preference. However, when fast asleep she may require assistance with pressure relieving movements; please prepare to assist. Please pay specific attention to bony prominences (e.g. knees, buttocks, heels, ankles) for any ongoing redness or signs of pressure. If after a four hour period, Haya has not changed positions during the night, please follow positioning schedule below:

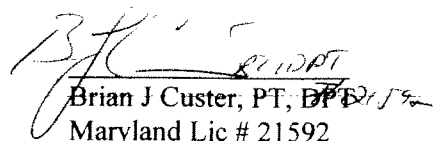

9pm – 12am L sidelying
12am – 3am R sidelying
3am – 6am L sidelying
6am – 9am R sidelying

Please refer to physician orders for clearance of Tub bath for patient.

Leslie A. White, SPT
