Discharge Summary

**JHH:
D.O.E: 07/10/2008**

Haya was discharged last night, as her and her family's inpatient and rehab goals were met. Haya had participated in and received comprehensive inpatient rehab evaluations, and is now deemed stable to discharge from inpatient care and return home with her family. Haya's family has cited a high interest in pursuing outpatient physical therapy care (while in the USA). All available efforts will be made to satisfy this request, providing outpatient physical therapy services at the frequency/intensity and for the remaining needs detailed in Haya's initial evaluation.

It has been a pleasure to work with Haya and her family during this admission at Kennedy Krieger Institute. If there are any further questions please feel free to contact me at 443.923.9280.
