Speech and Language (S/L)-Discharge Evaluation
and Progress Report

NAME: Al-Yasin, Haya

KK#: 12-19-03

JHH#: 8-433-61-49

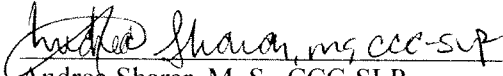

DOB: 6/9/03

TYPE OF SERVICE: BI Unit -S/L Discharge Evaluation and Progress Report
DATE OF DISCHARGE: 7/9/08
AGE OF PATIENT: 5 years, 1 month
REFERRAL SOURCE: Dr. Davoli
INFORMANT: Parents

PERTINENT BACKGROUND: Haya is a 5 year old girl from Kuwait with a history of astrocytoma status post resection and VP shunt, and seizure disorder who was brought to the Kennedy Krieger Children's Hospital for evaluation of her seizures and developmental delay. Haya was admitted to KKCH on 7/7/08. A speech-language evaluation was initiated as part of her inpatient stay. However, Haya's parents chose to discharge early on 7/9/08; therefore the evaluation could not be fully completed. An outpatient evaluation on conjunction with Assistive Technology was scheduled after discharge in order to complete the evaluation. Information and recommendations from the inpatient evaluation will be shared as part of the speech-language outpatient report.

Follow-up: Speech and Language

Category: III
